04 Payout Schedule

05 Payout Processing

06 Payout Disputes and Adjustments

SECTION 01

Introduction

1.1 This Trader Payout Policy (the "Policy") sets out the terms under which Docree Demo Funding (the "Company") distributes simulated profit shares to traders who have successfully passed the Company's evaluation program and been allocated a Funded Account.

1.2 All payouts described in this Policy represent compensation for successful trading performance on simulated trading accounts operated by the Company. No client funds are held or managed by the trader at any time.

SECTION 02

Profit Split

2.1 The Company shares a percentage of the simulated profits generated on Funded Accounts with the trader, as set out in the table below:

Stage	Trader Share	Company Share
First 3 payouts	80%	20%
Payouts 4+	85%	15%
After scaling (see Scaling Plan)	Up to 90%	10%+

2.2 The profit split is calculated on the net simulated profit of the Funded Account during the payout period, defined as total simulated gains minus total simulated losses, minus any applicable fees or rebates.

2.3 The Company reserves the right to adjust profit-split percentages for new Funded Accounts at its sole discretion. Existing Funded Accounts will retain the profit-split terms in effect at the time of account allocation, unless the trader voluntarily opts into updated terms.

SECTION 03

Payout Eligibility

3.1 To be eligible for a payout, the trader's Funded Account must meet all of the following conditions:

- The account is in good standing and has not breached any rules in the Trading Rules document.
- The account shows a net simulated profit above the minimum payout threshold (typically $50 – $100).
- The trader has completed a minimum number of trading days since account funding or the last payout.
- The trader has submitted complete KYC documentation and a valid payout method.
- There are no open disputes, investigations, or compliance holds on the account.

3.2 The trader must request a payout through the Company's trader dashboard. Payouts are not processed automatically, and any simulated profits not withdrawn remain subject to the Trading Rules (including drawdown limits).

3.3 The Company reserves the right to withhold or delay payouts where it has reasonable grounds to investigate the trader's trading activity for potential violations of the Trading Rules, including but not limited to prohibited strategies, coordinated trading, or exploitation of system vulnerabilities.

SECTION 04

Payout Schedule

4.1 The standard payout cycle is every fourteen (14) calendar days from the date of the previous payout (or from the date of account funding for the first payout).

4.2 The Company may offer expedited payout cycles (e.g., weekly or on-demand) as a promotional benefit or tier upgrade. Eligibility for expedited payouts will be clearly communicated to the trader via the dashboard or email.

4.3 Payout requests submitted before the cut-off time will be processed in the next scheduled batch. Payouts requested outside business hours or during holidays may experience processing delays.

SECTION 05

Payout Processing

5.1 Once a payout request is approved, the Company will process the payment within three (3) to five (5) business days via one of the following methods, selected by the trader:

- Bank wire transfer (SWIFT or SEPA, depending on jurisdiction).
- E-wallet transfer (Skrill, Neteller, or equivalent approved providers).
- Cryptocurrency (USDT on approved networks), where permitted by the trader's jurisdiction.

5.2 The Company bears the cost of its own payment processing fees. Any fees imposed by the trader's receiving bank, wallet, or exchange are the trader's sole responsibility.

5.3 Payouts are denominated in US Dollars (USD). Where the trader requests payment in another currency, conversion will be applied at the Company's prevailing exchange rate at the time of processing, which may include a conversion spread.

5.4 The trader is solely responsible for any taxes, declarations, or reporting obligations arising from payouts received under this Policy. The Company will issue statements and tax forms as required by applicable law in its jurisdiction.

SECTION 06

Payout Disputes and Adjustments

6.1 If the trader believes that a payout has been incorrectly calculated or processed, they must raise the dispute in writing within seven (7) days of the payout date. Claims received after this period will not be considered.

6.2 The Company reserves the right to reclaim or offset amounts from future payouts where it is subsequently determined that a prior payout was calculated incorrectly, paid in error, or issued in respect of trading activity that violated the Trading Rules.

6.3 Payout disputes and enquiries should be directed to hello@docree.com.
